Section B. Subject Index

Adaptive strategies, estimated impact on climate records for use in scheduling radiosondes, 2116
Advection, study of zonal, meriodional, vertical, and heat advection during the intraseasonal oscillation, 2409
Advective resonance mechanism, w.r.t. mechanism of the Antarctic circumpolar wave, 1461
Aerosols
  global aerosol optical climatology with two-channel AVHRR remote sensing, 2011
  indirect aerosol forcing by homogeneous and inhomogeneous clouds, 4042
Africa, recent trends of surface temperature minimum and maximum over eastern, 2876
Air–sea interaction
  decadal, North Atlantic based on observations and modeling results, 1195
  translating the nature of air–sea interactions into simple signatures, 3361
Alaska
  interannual variability in the Gulf of Alaska during 1991–94 El Niño, 1664
  summer difference among Arctic ecosystems in regional climate forcing, 2002
Albedo
  indirect aerosol forcing by homogeneous and inhomogeneous clouds, 4042
  relationship of, with clouds, as determined by satellites and models, 3842
  top-of-atmosphere estimation from angular distribution models, 1269
Aleutian low, complex empirical orthogonal function shows strengthening of Aleutian low in North Pacific with El Niño events, 3003
Altimetry, use of, for operational seasonal forecasting, 3115
Amazonia
  effects on the climate when carbon monoxide is combined with deforestation, 18
  pilot analysis of hourly rainfall in central and eastern Amazonia, 1326
Angular momenta
  Antarctic and Arctic oscillations, 681
  global atmospheric, annual, and semiannual variation of, w.r.t. harmonics, 3221
Anomalies
  climate in the Andes of Ecuador and relationship to sea surface temperature, 2520
  influence of Atlantic SST anomalies on the North Atlantic oscillation, 122
  prediction of tropical Pacific sea surface temperature anomalies, 3
  zonal-mean jet, of the northern winter, driven by stationary waves?, 2160
Antarctic
  analyses and reanalyses of ENSO signal in Antarctic precipitation, 1406
  development/validation of an Antarctic regional climate system model, sea ice, 1337, 1351
  sea ice extent variability and its global connectivity, 1697
Antarctic circumpolar current, w.r.t. mechanism of the Antarctic circumpolar wave, 1461
Antarctic circumpolar wave
  analysis of an interactive instability mechanism for, 1831
  influence of, on SST, moisture flux patterns, and Australian precipitation, 2125
  mechanism of, 1461
Antarctic sea ice, current trends, 1990s impact on a short climatology, 4441
Antarctica
  interpretation of temperature trends, 3885
  surface pressure trends in NCEP–NCAR reanalysis data over Antarctica, 3940
Anthropogenic forcing, w.r.t. decadal climate variability in future climate sensitivity experiment, 3728
Anthropogenic impacts, on climate, Bayesian methodology for assessing, 3805
Applied climatology, w.r.t. applications of a new, improved monthly gridded climate dataset, 2217
Arctic
  atmospheric hydrologic cycle over the Arctic basin from reanalyses, 923
  dominant timescale of natural climate variability in, 3412
  dynamical and microphysical characteristics of Arctic clouds, 1225
  regional climate anomalies, performance requirements for a coupled model, 383
  sea ice variability and recent atmospheric circulation trends, 617
  twentieth-century trends of Arctic precipitation, observation and simulation, 1362
  variations in surface air temperature, observations in the, 896
Arctic ecosystems, summer difference in regional climate forcing, 2002
Arctic heat budget, regional variability in fall and winter, 3500
Arctic Ocean, response to the North Atlantic oscillation, 2671
Arctic oscillations
  angular momenta of the Antarctic and Arctic oscillations, 681
  annular modes in extratropical circulation, 1018
  annular modes in month-to-month variability in extratropical circulation, 1000
  changes in, may be counteracting changes in thermohaline circulation, 3721
  influence in Arctic heat budget, 3500
  role of North Atlantic oscillation in thermohaline circulation from surface heat/freshwater flux observations, 3239
  wave-maintained annular modes of climate variability, 4414
Arctic sea ice, interplay between ice dynamics and thermodynamics w.r.t. recent changes in, 3099
Aridity, study showing continued pattern of drought in Africa, 2628
Asian–Australian monsoons, impact of ENSO on variability in GCM experiments, 4287
Asian monsoon, interannual variability from surface forcing and equilibration, 3342
Assimilation, w.r.t. use of altimetry for operational seasonal forecasting, 3115
Atlantic
  elements of climate variability in the tropical Atlantic region, 3261
  variability, tropical, and ENSO, interaction between, 2177
Atlantic Ocean, causes of Atlantic Ocean climate variability 1958–98, 2845
Atmosphere, seasonal state of, effect of interannual variations in SSTs on, 3139
Atmosphere–ocean, decadal timescale variability in hydrographic temperature profile, 2697
Atmosphere–ocean coupling, w.r.t. an ensemble of transient climate simulations to look at extremes, 3760
Atmosphere–ocean modeling, modeling with inclusion of physical initialization–based data assimilation, 2428
Atmospheric circulation
  effects of variations in East Asia snow cover, 3700

global monsoon seen through divergent atmospheric circulation, 3969
Atmospheric general circulation model
success of ensemble forecasting for AGCMs, 4196
translating the nature of air–sea interactions into simple signatures, 3361
Australia, intensity increase of nearby tropical cyclones due to climate change, 3029
AVHRR, use of, to examine relationship between clouds and albedo, 3842
Balkans, using self-organizing maps to investigate extreme climate events, 1718
BASE, dynamical and microphysical characteristics of Arctic clouds, 1225
Bayesian modeling, long-lead prediction of Pacific SSTs, 3953
Bayesian statistics, use of, for fingerprinting methodology for assessing climate change effects, 3805
Bias, clear-sky bias of TOVS upper-tropospheric humidity, 4034
Biosphere–atmosphere, impact of subgrid variability in rainfall interception using BATS, 2887
Biosphere–atmosphere model, use of, to study sensitivity of climate to changes in normalized difference vegetation index, 2277
Boreal forest, impacts of fire and warming on ecosystem uptake in, 2334
Boundary forcing, characteristics of two major subcomponents of the Asian summer monsoon, 2461
Boundary layer, spatial variability of atmospheric boundary layer structure, 1574
Brazil, real-time forecasting and verification for seasonal rainfall in, 3821
California, relationship of extreme precipitation events with Madden–Julian oscillation, 3576
Canonical correlation
agreement of observed rainfall trends and climate change simulations, 3057
neural networks vs canonical correlation analysis predicting SST, 287
Canopy interception, statistical–dynamical parameterization, 4050
Carbon dioxide, large-scale vegetation feedbacks on a doubled CO_2 climate, 1313
Carbon monoxide, effects on the climate of Amazonia when combined with deforestation, 18
Caribbean, interannual variability of Caribbean rainfall, ENSO, and Atlantic Ocean, 297
Case studies, regional climate anomalies in the Arctic, requirements for a coupled model, 383
Chaos theory, application of, to resonant interactions between solar activity and climate, 3745
Circulation
annular modes in extratropical, 1018
annular modes in month-to-month variability in extratropical circulation, 1000
atmospheric, over tropical Atlantic, local SST effect on, 2195
Northern Hemisphere patterns during extreme phases zonal-mean circulation, 1037, 1040
tropospheric, and the atmospheric water vapor cycle in South America, 1899
zonal–vertical, over equatorial Indian Ocean, role of, in climate variability, 2746
Circulation anomaly, Southwest rainfall modulated by sea surface temperature anomalies over equatorial and North Pacific, 3588
Circumpolar vortex, interannual variations in Southern Hemisphere winter, 991
Clear-sky longwave cooling, regional and seasonal variations over tropical ocean, 2863
Clear-sky, longwave radiation, evaluation of simulated, using ground-based observation, 1951
Climate
terrestrial surface, new, improved 1901–96 monthly gridded dataset of, 2217
variability, twentieth-century space–time, w.r.t. new, improved monthly dataset, 2217
Climate change
and intensity increase of tropical cyclones near Australia, 3029
Bayesian fingerprinting methodology for assessing anthropogenic impacts, 3805
change in Arctic oscillation may be counteracting changes in thermohaline circulation, 3721
effect of radiosonde instrumentation changes on observed water vapor, 3337
impact on poleward movement of tropical cyclonelike vortices, 1116
interpretation of Antarctic temperature trends, 3885
Northern Hemisphere snow cover variability and change, 1915–97, 2339
probability of future climatically significant volcanic eruptions, 1445
sensitivity of climate to changes in normalized difference vegetation index, 2277
solar activity could be more significant than has previously been supposed, 3745
synoptic-scale midtropospheric U. S. temperature variance unchanged since 1958, 2323
understanding responses of GCM land surface schemes to, 3066
use of coupled GCM to examine changes in extremes, 3760
w.r.t. decadal variability and anthropogenic forcing in GCM experiments, 3728
w.r.t. tropospheric temperature estimates and uncertainties, 3187
Climate change modeling, of the stratosphere, w.r.t. to projected changes in greenhouse gases, 2142
Climate dataset, new, improved monthly, of precipitation, temperature, and temperature range, 2217
Climate extremes, changes in, in an ensemble of transient simulations with coupled GCM, 3760
Climate forecasts, operational probabilistic long-lead, interpretation of, 1965
Climate models
coupled atmosphere–ocean–sea-ice, use of, to study Southern Hemisphere, 1461
development/validation of an Antarctic regional climate system model, sea ice, 1337, 1351
use of stochastic weather generator to provide data for global/local areas, 2973
Climate modeling
structure of midlatitude storm track controlled by barotropic deformation, 2712
water vapor feedbacks in ECMWF reanalysis and Hadley Centre climate model, 3080
Climate monitoring, improving existing climate monitoring/forecasting in East Africa, 3915
Climate noise, timescale, power spectra, and climate noise properties of teleconnection, 4430
Climate records, estimated impact of adaptive strategies for scheduling radiosondes, 2116
Climate System Model, NCAR, response of, to increased CO_2, and the role of physical processes, 1879
Climate variability
decadal, w.r.t. anthropogenic forcing in GCM sensitivity experiments, 3728
in the subpolar Southern Hemisphere and the Antarctic circumpolar wave, 1461
interannual, and vegetation, effects of, on shaping the African savanna, 2665
interpretation of Antarctic temperature trends, 3885
persistence of decadal SST anomalies in the North Atlantic, 3017

wave-maintained annular modes of climate variability, 4414
Climate variation, delineate north–south structure for dominant modes of climate variability, 3209
Climatological forecasts
correction of systematic errors in coupled GCM forecasts, 2072
interdecadal change of the structure of the ENSO mode, impact on frequency, 2044
Climatology
clouds of the southern Great Plains clouds and radiation test bed, 1762
population metadata update for U.S. historical climatology network stations, 4028
Clouds
and radiation variations with northern midlatitude sea level pressure, 312
climatology of the southern Great Plains clouds and radiation test bed, 1762
dataset of global vertical profiles of, derived from rawinsonde relative humidity, 3041
development, frontal, investigating modeling requirements for, 2729
dynamical and microphysical characteristics of Arctic clouds, 1225
Indian Ocean low clouds during the winter monsoon, 2028
interannual and interdecadal variability over summertime North Pacific, 422
ISCCP low, tropical sensitivity of a coupled model to, 2239
layer, parameterization of, in GCMs, w.r.t. midlatitude cyclonic simulation, 1972
low cloud type, vertical motion and regional surface synoptic environment, 245
near-global observations of low clouds, 1255
net cloud radiative forcing at the top of the atmosphere in Asia, 650
parameterization of the optical properties for water clouds in the infrared, 1797
radiative effects of cloud-type variations, 264
relationship of cloud cover to near-surface temperature and humidity in GCM, 1858
relationship of, with radiation quantities from satellites and models, 3842
scale dependence of monsoonal convective systems of the Indian Ocean, 1286
sensitivity of parameterizations to changes in vertical resolution, 915
temperature dependence of liquid water path of low clouds, 3465
top-of-atmosphere albedo estimation from angular distribution models, 1269
Cloud cover, strengthening (weakening) of cooling over subtropical (high latitude) regions, 4341
Cloud-to-ground flashes, summary of lightning-related deaths, injuries, and damage reports, 3448
Cloud layer overlap, sensitivity of atmospheric radiative heating rate profiles to variations of, 2941
Cloud microphysics
indirect aerosol forcing by homogeneous and inhomogeneous clouds, 4042
role of, in the tropical climate: cloud-resolving model perspective, 2306
Cloud–radiation process, sensitivity of parameterizations to changes in vertical resolution, 915
Cloud type, radiative effects of cloud-type variations, 264
Cold fronts, Australian, w.r.t. subgrid-scale forcing and correct global modeling, 2729
Community Climate Model, assessment of performance and uncertainties of, 3860
Complex principal component, analysis of sea surface temperature anomalies in the Nordic seas, 1044
Convection
important term in balance of anomalous diabatic heating, 3285
model of diurnal variation of convection over tropical land area, 4159
relationship with sea surface temperatures on intraseasonal timescales, 2086
Cooling, intraseasonal surface, in the equatorial western Pacific, 2261
Coupled models
atmosphere–ocean, use of, to study Antarctic circumpolar wave, 1831
correction of systematic errors in coupled GCM forecasts, 2072
coupled ocean–atmosphere model with/without oceanic eddy-induced advection, 139
ECHO-2 coupled GCM, Indian Ocean response to ENSO, 1371
ENSO response to greenhouse warming, Hadley Centre, 1299
ENSO simulated with intermediate coupled model, evaluated with observations, 1605, 1635
four-box, of ocean–atmosphere for decadal/interdecadal oscillations, 2801
identification of dynamical regimes in an intermediate coupled model, 2105
intermediate, sensitivity of, to tropical Pacific ocean vertical structure, 2363
regional climate anomalies in the Arctic, requirements for a coupled model, 383
simple coupled atmosphere–ocean–sea ice–land coupled model, 1150
simulations for 125 kyr BP, 1057
thermal expansion in ocean and coupled general circulation models, 1384
tropical cooling, atmosphere–mixed layer ocean model, 951
troposphere–planetary boundary layer interactions, 339
use of, to model an ensemble of transient climate simulations, 3760
Coupled ocean–atmosphere, decadal variability and predictability, midlatitude ocean–atmosphere, 1073
Coupled ocean–atmospheric general circulation model, role of ocean dynamics for low-frequency fluctuations of the North Atlantic oscillation, 2536
Coupling, zonal eddy dynamics of North Atlantic oscillation, 3893
Covariance, covariability of spring snowpack and summer rainfall in the U.S. Southwest, 4018
Current trends, Antarctic sea ice, 1990s impact on a short climatology, 4441
Cyclones
mean Southern Hemisphere extratropical cyclone behavior, 873
variability of Southern Hemisphere extratropical cyclone behavior, 550
Cyclonic cloud system, coarse-grid and cloud-resolving simulations of midlatitude, w.r.t. GCMs, 1972
Cyclostationary EOFs, optimal detection using, 938
Cyclostationary processes, statistical prediction, 1098
Data assimilation
method to adjust long-term temperature extreme series for inhomogeneities, 3680
use of TOPEX/Poseidon sea level data for ocean analyses and prediction, 216
Data inhomogeneities, method to adjust long-term temperature extreme series, 3680
Databases, using a global soil wetness database to improve seasonal climate simulation, 2900
Datasets
Arctic Ocean response to the North Atlantic oscillation, 2671
effect of successive correction on variability estimates for climatological, 1845
monthly mean clear-sky longwave dataset, effects of 1998 ENSO event, 4256
near-global observations of low clouds, 1255
using empirical orthogonal teleconnections, 1421

Decadal anomalies, persistence of SST anomalies in the North Atlantic, 3017
Decadal timescale, between Pacific Ocean Tropics and midlatitudes on, 1173
Deciduous forest phenology, feedbacks on seasonal climate patterns in the western Canadian interior, 4229
Deep ocean, mass transport variability: spectral shapes and spatial scales, 1916
Deep water, imperfections of thermohaline circulation, latitudinal asymmmetry, 366
Deforestation, effects on the climate of Amazonia when combined with doubled CO_2, 18
Deformation, barotropic, and storm tracks in assessing climate models, 2712
Diabatic heating, ENSO, in ECMWF and NCEP–NCAR reanalyses and CCM3 GCM simulation, 3152
Dipole correlation structure, between tropical Atlantic SST and Brazilian rainfall, influence of ENSO on, 2177
Diurnal cycle, of precipitation over land and ocean using TRMM precipitation radar, 4087
Diurnal variation
  diurnal variations of precipitation over tropical oceans using TMI data, 4149
  model of diurnal variation of convection over tropical land area, 4159
Divergence, forcing, w.r.t. annual global atmospheric angular momentum variations, 3221
Downscaling
  neural networks used for spatial interpretation of temperatures for GCMs, 886
  w.r.t. agreement of observed rainfall trends and climate change simulations, 3057
Drought
  dependence of summertime daily maximum temperature on antecedent soil moisture, 2641
  ENSO variability and SST teleconnections to summer drought in the United States, 4244
  long-term change in rainfall in semiarid zones in Africa, 2628
  w.r.t. interannual variability in rainfall, etc., in West Africa, 3827
Dynamical regimes, identification in an intermediate coupled ocean–atmosphere model, 2105
East Asia, Pacific–East Asian teleconnection effect on East Asian climate, 1517
Eastern equatorial Pacific, spatial variability of atmospheric boundary layer structure, 1574
Ecosystem uptake, impacts of fire and warming on, in the boreal forest, 2334
Eddies
  coupled ocean–atmosphere model with/without oceanic eddy-induced advection, 139
  eddy isopycnal thickness diffusivity of Gent–McWilliams subgrid mixing, 502
  zonal eddy dynamics of North Atlantic oscillation, 3893
Eemian climate, coupled ocean–atmosphere model simulations for 125 kyr BP, 1057
Ekman regime, annual adjustment of the thermocline in the tropical Pacific Ocean, 596
El Niño
  changes in the equatorial Pacific and relationship to El Niño and La Niña, 3551
  changes of probability associated with El Niño, 4268
  correlation between rainfall intensity and storm height to estimate precipitation, 4107
  covariabilities of winter U.S. precipitation and Pacific SST, 3711
  energetics of El Niño and La Niña, 1496
  heat sources and sinks of 1986–87, 3533
  impact on variability of the Asian–Australian monsoons in GCM experiments, 4287
  interannual variability in the Gulf of Alaska during 1991–94, 1664
  rectification of the Madden–Julian oscillation into the ENSO cycle, 3560
  relative to previous El Niño events, 488
  simulation of El Niño impact over South America and African rainfall anomalies, 2428
  Southern Oscillation sea level pressures, surface temperatures, and precipitation, 4358
  southern South American climate variability associated with, 35
  statistical prediction of cyclostationary processes, 1098
  tropical cyclone activity over western North Pacific, 2960
  vs La Niña, comparing mesoscale convective systems in, 3314
  weakening of Aleutian low and subsequent El Niños, 3003
  w.r.t. global warming in coupled model in response to increased CO_2, 1879
  w.r.t. tropical Pacific SST anomalies and equatorial westerly wind events, 1814
  w.r.t. use of inverse technique and TAO data to evaluate coupled model, 2770
El Niño–Southern Oscillation
  analyses and reanalyses of ENSO signal in Antarctic precipitation, 1406
  Asian monsoons and ENSO-related factors: decadal timescale fluctuations, 2461
  atmospheric circulation structures associated with ENSO and non-ENSO, 3915
  changes of probability associated with El Niño, 4268
  determining dominant timescale of ENSO and interdecadal oscillations, 3209
  diabatic heating in ECMWF and NCEP–NCAR reanalyses and CCM3 GCM simulation, 3152
  ECHO-2 coupled GCM, Indian Ocean response to ENSO, 1371
  effect of tropical Pacific SSTs on seasonal atmospheric variability, 3139
  effects of variations in East Asia snow cover on atmospheric circulation, 3700
  El Niño 1997/98 relative to previous El Niño events, 488
  ENSO not the only factor influencing summer rainfall in the Southwest United States, 3588
  ENSO variability and SST teleconnections to summer drought in the United States, 4244
  impact on variability of the Asian–Australian monsoons in GCM experiments, 4287
  Indian monsoon–ENSO relationship on interdecadal timescale, 579
  indices based on patterns of satellite-derived precipitation data, 2786
  influence of rainfall amounts and zones in Africa, 2628
  interaction between tropical Atlantic variability and, 2177
  interannual variability from surface forcing and equilibration, 3342
  interannual variability of Caribbean rainfall, ENSO, and Atlantic Ocean, 297
  interannual variability of ENSO events, Aleutian lows, 3003
  interannual variability of upper troposphere water vapor, extratropics, 59
  interdecadal change of the structure of the mode, impact on frequency, 2044
  internal ENSO dynamics with seasonal cycle as determined with Markov model, 3327
  long-lead prediction of Pacific SSTs via Bayesian dynamic modeling, 3953
  model of ENSO phases and subsequent precipitation in South America, 2973
  monthly mean clear-sky longwave dataset, effects of 1998 ENSO event, 4256
  Pacific–East Asian teleconnection effect on East Asian climate, 1517

physical mechanism responsible for transition from a warm to a cold state, 2056
predictability of interannual variability where ENSO events are strong, 2591
prediction with Markov models, the impact of sea level, 849
recharge oscillator paradigm, investigation using a simple coupled model, 1987
response to greenhouse warming, Hadley Centre second couple model, 1299
result of stochastic transient growth in linearly stable coupled system, 2818
role in interannual variability of summer monsoon onset, 2483
role in wind pattern, heating, SSTs, and impact on Atlantic, 3285
role of, w.r.t. Antarctic circumpolar wave and Australian precipitation, 2125
sensitivity of the tropical hydrological cycle to, 538
simulated by intermediate coupled models, evaluated with observations, 1635
simulated with intermediate coupled model, evaluated with observations, 1605
tropical cyclone activity over western North Pacific with El Niño/La Niña, 2960
use of TOPEX/Poseidon sea level data for ocean analyses and prediction, 216
variations in phase locking, 2570
variations, prediction of, from sea level anomaly studies, 2757
vector analysis technique for predictability of coupled model for ENSO, 3298
w.r.t. comparing mesoscale convective systems in El Niño and La Niña, 3314
w.r.t. effect of South Indian convergence zone on southern Africa rainfall, 3789
w.r.t. interannual variability of North American monsoon system, 2794
El Niño SST, strong influence on U.S. precipitation and surface air temperature, 3435
Empirical orthogonal functions
ocean response to low-frequency interannual atmospheric variability, 732
use of, to investigate zonal mean flow variability and climate noise, 2356
using empirical orthogonal teleconnections, 1421
Energetics, of El Niño and La Niña, 1496
Energy balance, model based on potential vorticity homogenization, 431
Ensemble forecasting
spaceborne rainfall/moisture observations to improve climate analysis/forecasting, 4180
success of ensemble forecasting for AGCMs, 4196
Ensemble hindcasts, during winter and summer seasons over North America using Eta Model, 2605
Entropy conservation, numerical uncertainties in the simulation of, 3860
Equatorial westerly wind event, w.r.t. El Niño and tropical Pacific SST anomalies, 1814
Equatorial wind, role of solar cycle and equatorial wind in quasi-biennial oscillation phase, 328
Eta Model, used in ensemble hindcasts during summer and winter seasons, 2605
European climate, climate change simulations of, agreement of, with observed rainfall trends, 3057
European Reanalysis Agency, mean Arctic precipitation from reanalyses data, 182
Evapotranspiration
climate model's success/failure to accurately simulate evapotranspiration, 2887
dependence of summertime daily maximum temperature on antecedent soil moisture, 2641
Extremes
extreme precipitation events in the western United States, tropical forcing, 793
Northern Hemisphere patterns during extreme phases zonal-mean circulation, 1037, 1040
trends in Nordic and Arctic temperature extremes and ranges, 977
Feedbacks
ice–albedo, w.r.t. Arctic sea ice changes, 3099
large-scale vegetation feedbacks on a doubled CO_2 climate, 1313
ocean feedback in response to 6 kyr BP insolation, 1537
vegetation–climate feedbacks the conversion of tropical savanna, 1593
water vapor, in the ECMWF reanalysis and Hadley Centre climate model, 3080
Fenno–Scandia, trends in Nordic and Arctic temperature extremes and ranges, 977
Fingerprinting, Bayesian methodology for assessing anthropogenic impacts on climate, 3805
Fires, impact on ecosystem uptake in the boreal forest, 2334
Floods, trends of precipitation and damaging floods in the United States, 3625
Floquet analysis, on linearized variant of Zebiak–Cane ENSO model to determine ENSO causes, 2818
Fluxes, parameterization mesoscale enhancement of surface fluxes for large-scale, 402
Forcing
extreme precipitation events in the western United States, tropical forcing, 793
multidecadal thermohaline circulation variability driven by surface flux, 1481
Forecasts, operational probabilistic long-lead (climate), interpretation of, 1965
Forecasting
forecasting skill diminishes when seasonal Markov models are interchanged, 3327
identification of biases in Climate Prediction Center long-lead outlooks, 1995–98, 2389
improving existing climate monitoring/forecasting in East Africa, 3915
making improvements in the specificity of hurricane climate forecasts, 2293
seasonal, in Central America and Caribbean, and off-equatorial heat source, 2177
using vector analysis for predictability of coupled model for ENSO studies, 3298
Forecast verification
of Climate Prediction Center long-lead outlooks, 1995–98, unconditional and conditional biases, 2389
real-time, for seasonal rainfall in Brazil, 3821
Forests, boreal, impacts of fire and climate warming on ecosystem uptake in, 2334
Freezing level
associated with heavy rain regimes and distinct seasonal cycle, 4125
comparison of freezing level and brightband altitude with NCEP–TRMM data, 4137
General circulation, rectification of the Madden–Julian oscillation into the ENSO cycle, 3560
General circulation models
anthropogenic forcing w.r.t. decadal future climate variability, 3728
assessment of performance and uncertainties of the NCAR CCM, 3860
barotropic deformation as diagnostic tool to assess climate simulation errors, 2712
changes of probability associated with El Niño, 4268

coupled, w.r.t. 1000-yr integrations to examine deep-ocean transport, 1916
delineate north–south structure for dominant modes of climate variability, 3209
ECHO-2 coupled GCM, Indian Ocean response to ENSO, 1371
effect of interannual variations in SSTs on seasonal mean atmospheric state, 3139
evaluation of CCM3 using a dynamical diagnosis strategy, 3172
implications of four-box model of ocean–atmosphere for decadal oscillation, 2801
interannual variability of monsoon onset in western North Pacific, 2483
modeling hydrological systems at the continental scale, accuracy, 686
neural networks used for spatial interpretation of temperatures, 886
parameterization of layer clouds in, w.r.t. midlatitude cyclonic simulation, 1972
parameterization of subgrid-scale forcing for correct cloud development, 2729
response of NCAR Climate System Model to increased CO_2, 1879
responses of land surface schemes in, to climate change, 3066
role of North Atlantic oscillation in thermohaline circulation from surface heat/freshwater flux observations, 3239
simple coupled atmosphere–ocean–sea ice–land coupled model, 1150
southern midlatitude zonal wind interaction with ocean in simulations, 562
subsidence and upper-tropospheric drying along trajectories in a, 257
use of Canadian Global Coupled Model for transient climate simulations, 3760
use of ECMWF and NCEP–NCAR reanalyses to evaluate CCM3 w.r.t. diabatics, 3152
vs observations w.r.t. relationship of cloud cover to temperature/humidity, 1858
Global climate change, w.r.t. tropospheric temperature estimates and uncertainties, 3187
Global climate models, role of ocean dynamics for low-frequency fluctuations of the NAO, 2536
Global monsoon, through the divergent atmospheric circulation, 3969
Global warming
impacts on ecosystem uptake in the boreal forest, 2334
Northern Hemisphere snow cover variability and change, 1915–97, 2339
probability of future climatically significant volcanic eruptions, 1445
sensitivity of GFDL model hurricane intensity to thermodynamic environment, 109
simulated using a simple model, 202
w.r.t. decadal variability and anthropogenic forcing in GCM experiments, 3728
w.r.t. regional processes in coupled model in response to increased CO_2, 1879
w.r.t. response of the stratosphere to changes in greenhouse gases, 2142
Grassland, vegetation–climate feedbacks, the conversion of tropical savanna, 1593
Great Plains, temperature dependence of liquid water path of low clouds, 3465
Greenhouse
El Niño–Southern Oscillation response, Hadley Centre second coupled model, 1299
warming simulation, tropical stabilization of thermohaline circulation in, 1809
water vapor feedbacks in ECMWF reanalysis and Hadley Centre climate model, 3080
Greenhouse gases
probability of future climatically significant volcanic eruptions, 1445
response of the stratospheric climate to projected changes in, 2142
Greenland Sea Deep Water, role of North Atlantic oscillation in thermohaline circulation from surface heat/freshwater flux observations, 3239
Grid resolution, w.r.t. parameterization of layer clouds in GCMs, 1972
Gulf Stream
decadal evolution of warm/cold anomalies in subtropical and subpolar gyres, 2697
position shift interannually with subtropical mode water and North Atlantic oscillation, 2550
Hail, long-term fluctuation in hail incidences in the United States, 658
Harmonics, of annual variation of global atmospheric angular momentum and divergence, 3221
Harmonic analysis, used to examine oscillation in time series of 3-hourly precipitation amount, 2923
Heat balance, heat sources and sinks of 1986–87 El Niño, 3533
Heat budgets
regional variability in Arctic fall and winter, 3500
sea surface temperature in the Pacific warm pool and, 634
transequatorial heat transports balance heat budget of North Indian Ocean, 3342
Heat flux, surface, downward, in tropical Atlantic during boreal spring, and ENSO, 2177
Heating, diabatic, linkage between GCM surface wind and errors in, 3172
Hindcasting, interannual, for Australian precipitation using Antarctic circumpolar wave, 2125
Historical data, population metadata update for U.S. historical climatology network stations, 4028
Holocene, sensitivity of monsoons to mid-Holocene insolation, data inferred changes, 164
Humidity
and temperature, near-surface, relationship of, to cloud cover in GCMs, 1858
clear-sky bias of TOVS upper-tropospheric humidity, 4034
cloud–surface air temperature weakened due to increase in atmospheric humidity, 4341
thermodynamic and radiative impact of correction of sounding bias, 3611
Hurricanes
activity over western North Pacific associated with El Niño and La Niña, 2960
modulation of eastern North Pacific, by Madden–Julian oscillation, 1451
sensitivity of GFDL model hurricane intensity to thermodynamic environment, 109
statistical and physical bases for understanding regional variations in, 2293
testing for trend in partially incomplete record, 3696
Hydrology
atmospheric cycle over the Arctic basin from reanalyses, 923
climate, model climate stability and perturbations of hydrological cycle, 463
modeling hydrological systems at the continental scale, accuracy, 686
pilot analysis of hourly rainfall in central and eastern Amazonia, 1326
Hydrologic cycle
influence of soil water-holding capacity on global water cycle in GCM, 4393
sensitivity of the tropical hydrological cycle to ENSO, 538
Ice, Arctic sea, and interplay between ice dynamics and thermodynamics, 3099
India, intraseasonal and interannual variability of rainfall over India, 4366

Infrared, parameterization of the optical properties for water clouds in the, 1797
Insolation, ocean feedback in response to 6 kyr BP insolation, 1537
Instability mechanism, interactive, for the Antarctic circumpolar wave, 1831
Interannual variability
  interannual and interdecadal variability of East Asian summer monsoon and SST, 4310, 4326
  intraseasonal and interannual variability of rainfall over India, 4366
  role of circulation cells along the equator, 2746
Interception, statistical–dynamical parameterization, 4050
Intercomparison, causes of Atlantic Ocean climate variability 1958–98, 2845
Interconnections, between Pacific Ocean Tropics and midlatitudes on decadal timescale, 1173
Interdecadal oscillations, determining dominant timescale of ENSO and interdecadal oscillations, 3209
Interdecadal variability, interannual and interdecadal variation of East Asian monsoon and tropical SST, 4310, 4326
Intraseasonal oscillation, temporal and advective terms in heat/salt balance equations during the intraseasonal oscillation, 2409
Intraseasonal timescales, relationship between sea surface temperatures and convection on, 2086
Intraseasonal variability, intraseasonal and interannual variability of rainfall over India, 4366
Inversion techniques, use of, with TAO dataset to reject performance of coupled model, 2770
ISCCP
  data, used to constrain cloud overlap occurrence in studying radiative heating, 2941
  low clouds, tropical sensitivity of a coupled model to, 2239
Isentropic processes, numerical uncertainties in the simulation of reversible, 3860
Isopycnic model, use of, to investigate stochastic forcing of thermocline variations, 2833
ITCZ
  effect of, on vertical cloud structure, 3041
  ENSO, and SST relations with North American monsoon system, 2794
Jet, anomalies of the northern winter, zonal-mean, driven by stationary waves?, 2160
Kuroshio Current extension, evidence for wind-driven intensification of, comment, 1994; reply, 1995
La Niña
  correlation between rainfall intensity and storm height to estimate precipitation, 4107
  covariabilities of winter U. S. precipitation and Pacific SST, 3711
  energetics of El Niño and La Niña, 1496
  southern South American climate variability associated with, 35
  tropical cyclone activity over western North Pacific, 2960
  vs El Niño, comparing mesoscale convective systems in, 3314
  w.r.t. use of inverse technique and TAO data to evaluate coupled model, 2770
Landfall, of major hurricanes along U.S. coasts, causes for variation in likelihood, 2293
Land surface hydrology, simulation of biosphere, atmosphere, biosphere–atmosphere equilibrium, 2887
Land surface schemes, GCM, understanding responses of, to climate change, 3066
Last glacial maximum
  influence of model horizontal resolution on climate data, 1554
  tropical cooling, atmosphere–mixed layer ocean model simulation, 951
Lightning
  characteristics of lightning using TRMM Lightning Imaging Sensor, 4087
  summary of lightning-related deaths, injuries, and damage reports, 3448
Likelihood function test, testing for trend in partially incomplete hurricane record, 3696
Linear inverse modeling, identification of dynamical regimes in an intermediate coupled model, 2105
Liquid water content, parameterization of the optical properties for water clouds in the infrared, 1797
Liquid water path, temperature dependence of liquid water path of low clouds, 3465
Long-lead forecasting
  Bayesian dynamic modeling of Pacific SSTs, 3953
  diagnostic verification analysis of CPC products and bias identification, 2389
Longwave cooling, regional and seasonal variations over tropical ocean, 2863
Longwave heating, anomalies, contribution of, to GCM modeled surface winds, 3172
Longwave radiation, cloud–surface air temperature weakened due to increase in atmospheric humidity, 4341
Lorenz equations, application of, to resonant interactions between solar activity and climate, 3745
Madden–Julian oscillation
  modeling of, w.r.t. intraseasonal cooling in the equatorial western Pacific, 2261
  modulation of eastern North Pacific hurricanes by, 1451
  preceding factor in onset of 1997 El Niño (systematic transfer of energy), 2428
  rectification into the ENSO cycle, 3560
  relationship with extreme precipitation events in California, 3576
Markov models
  ENSO prediction with Markov models, the impact of sea level, 849
  prediction of tropical Pacific sea surface temperature anomalies, 3
  whether internal dynamics of ENSO possess annual cycle (w.r.t. SST anomalies), 3327
Mass transport, deep-ocean, variability of: spectral shapes and spatial scales, 1916
Mediterranean Sea, ocean response to low frequency interannual atmospheric variability, 705, 732
Mesoscale, precipitation in NCEP reanalysis, validation of, using new grid cell dataset, 1936
Mesoscale convective complex, tropical, compared in El Niño and La Niña, 3314
Midtroposphere, low-frequency signals in submonthly temperature variance, 2323
Models, solution uncertainties in single-column model frameworks, 352
Model bias, regional model simulation of 1991 severe precipitation event, China, 93
Model evaluation
  ENSO diabatic heating in ECMWF and NCEP–NCAR reanalyses and CCM3, 3152
  of CCM3 surface winds using a dynamical diagnosis strategy, 3172
Model simulation, value of subgrid-scale processes to simulate midlatitude frontal clouds, 2729
Modeling
  annual adjustment of the thermocline in the tropical Pacific Ocean, 596
  climate, model climate stability, and perturbations of hydrological cycle, 463
  decadal air–sea interaction North Atlantic, observations and, 1195
  decadal variability and predictability, midlatitude ocean–atmosphere, 1073
  eddy isopycnal thickness diffusivity of Gent–McWilliams subgrid mixing, 502
  elements of climate variability in the tropical Atlantic region, 3261

energy balance model based on potential vorticity homogenization, 431
feedback mechanisms and creating self-sustaining oscillations in North Atlantic, 2550
four-box model of ocean–atmosphere for decadal/interdecadal oscillations, 2801
global warming simulated using a simple model, 202
hydrological systems at the continental scale, accuracy, 686
linear stochastic dynamical, shows role of transient growth in ENSO, 2818
responses of GCM land surface schemes to climate change, 3066
scale dependence of monsoonal convective systems of the Indian Ocean, 1286
sensitivity of GFDL model hurricane intensity to thermodynamic environment, 109
solution uncertainties in single-column model frameworks, 352
surface wind momentum balance and modeling the linear friction coefficient, 1733
temperature variability in three 1000-yr coupled model integrations, 513
thermal expansion in ocean and coupled general circulation models, 1384
upper-ocean model for short-term climate variability, 3380
Monsoons
better definition of regional aspects of Asian summer monsoon, 2461
impact of ENSO on variability in GCM experiments, 4287
Indian monsoon–ENSO relationship on interdecadal timescale, 579
Indian Ocean low clouds during the winter monsoon, 2028
interannual and interdecadal variability of East Asian summer monsoon and SST, 4310, 4326
intraseasonal and interannual varibility of rainfall over India, 4366
model simulations of North American monsoon systems, 2428
net cloud radiative forcing at the top of the atmosphere in Asia, 650
rainfall, interannual variation in Indochina summer: possible mechanism, 1979
role of ENSO and SST in interannual variability of summer monsoon onset, 2483
scale dependence of monsoonal convective systems of the Indian Ocean, 1286
sensitivity of monsoons to mid-Holocene insolation, data inferred changes, 164
summer, effect of, on vertical cloud structure, 3041
summer regime with wet (dry) monsoon more like after dry (wet) winter in the United States, 3588
system, North American, interannual variability of, 2794
Monsoon rainfall, ensemble forecasting as used to predict monsoon rainfall, 4196
NASA GEOS-1, diurnal and semidiurnal components of assimilated amounts of precipitation, 2923
Natural modes, wave-maintained annular modes of climate variability, 4414
NCEP–NCAR reanalyses
low-frequency variability in the Southern Hemisphere and SST anomalies, 3599
mean Arctic precipitation from reanalyses data, 182
relationship of extreme precipitation events in California with the Madden–Julian oscillation, 3576
Neural networks
nonlinear principal component analysis by neural networks, Lorenz system, 821
used for spatial interpretation of temperatures for GCM downscaling, 886
using self-organizing maps to investigate extreme climate events, 1718
vs canonical correlation analysis predicting SST, 287
Noise, climate, w.r.t. interannual zonal mean flow variability, 2356
Nordic seas, sea surface temperature anomalies in the, 1044
Normalized difference vegetation index, sensitivity of climate to changes in, 2277
North Atlantic, persistence of decadal SST anomalies, 3017
North Atlantic Ocean, decadal evolution of warm/cold anomalies in subtropical and subpolar gyres, 2697
North Atlantic oscillation
Arctic Ocean response to the, 2671
changes in, may be counteracting changes in thermohaline circulation, 3721
influence of Atlantic SST anomalies on the, 122
optimal interpolation analysis applied to sea level pressure data and verification with land observations, 2987
potential of, to indicate frequency of major hurricane landfalls, 2293
relations between potential vorticity, North Atlantic oscillation index, and the Gulf Stream, 2550
role of North Atlantic oscillation in thermohaline circulation from surface heat/freshwater flux observations, 3239
role of ocean dynamics for low-frequency fluctuations in coupled GCM, 2536
study shows two separate models of variability in Atlantic, 3285
w.r.t. Arctic sea ice changes and ice dynamics/thermodynamics interplay, 3099
zonal eddy dynamics of, 3893
North Pacific Ocean, effects of variations in East Asia snow cover on atmospheric circulation, 3700
Northern sinking, imperfections of themohaline circulation, latitudinal asymmmetry and, 366
Observations
changes in the equatorial Pacific and relationship to El Niño and La Niña, 3551
clouds of the southern Great Plains clouds and radiation test bed, 1762
dependence of satellite sampling errors on monthly averaged rain rates, 449
low cloud type, vertical motion, and regional surface synoptic environment, 245
near-global observations of low clouds, 1255
variability and trends in Antarctic surface temperature, 1674
Ocean
use of altimetry for assimilating sea level into operational coupled models, 3115
vertical mixing, influence of, on sharpness of equatorial thermocline, 3638
Ocean–atmosphere models
coupled ocean–atmosphere model with/without oceanic eddy-induced advection, 139
coupled, rejection of performance of, using TAO data and inversion techniques, 2770
coupled tropical Pacific, sensitivity of, to its oceanic vertical structure, 2363
influence of themohaline circulation on projected sea level pressure rise, 1997
modeling for decadal/interdecadal oscillations, 2801
temperature variability in three 1000-yr coupled model integrations, 513
w.r.t. tropical sensitivity to specified ISCCP low clouds, 2239
Ocean–atmosphere system
difficulty of quantifying effects of cloud microphysics in, 2306
interannual variability w.r.t. surface wind stress fields over Pacific Ocean, 3003
Ocean circulation, changes in Arctic oscillation may be counteracting changes in thermohaline circulation, 3721
Ocean dynamics, role in fluctuations of the North Atlantic oscillation in a coupled ocean–atmosphere GCM, 2536

Ocean general circulation model
study of annual cycle of Indian Ocean, 3342
translating the nature of air–sea interactions into simple signatures, 3361
Ocean surface density, troposphere–planetary boundary layer interactions, 339
Ocean weather stations, low cloud type, vertical motion, and regional surface synoptic environment, 245
Oceanic vertical structure, sensitivity of intermediate ocean–atmosphere coupled model to, 2363
Off-equatorial ocean, ENSO simulated by intermediate coupled models, evaluated with observations, 1635
Optical climatology, global aerosol optical climatology with two-channel AVHRR remote sensing, 2011
Optimal detection, using cyclostationary EOFs, 938
Optimal interpolation, calculating monthly marine sea level pressure and estimating error, 2987
Oscillations, angular momenta of the Antarctic and Arctic oscillations, 681
Pacific, long-lead prediction of SSTs via Bayesian dynamic modeling, 3953
Pacific–North American pattern, relationship to both tropical and North Pacific SST anomalies, 3435
Pacific Northwest, new gridcell dataset, use of, to validate precipitation in NCEP reanalysis, 1936
Pacific Ocean, tropical, analysis of monthly sea level variations in, 2757
Pacific–South American, low-frequency variability in the Southern Hemisphere and SST anomalies, 3599
Pacific warm pool, heat budgets and sea surface temperature in the Pacific warm pool, 634
Paleoclimate
influence of model horizontal resolution on climate data, 1554
ocean feedback in response to 6 kyr BP insolation, 1537
simple coupled atmosphere–ocean–sea ice–land coupled model, 1150
Paleoclimatology, sensitivity of monsoons to mid-Holocene insolation, data inferred changes, 164
Parameterization
eddy isopycnal thickness diffusivity of Gent–McWilliams subgrid mixing, 502
factors controlling upper-troposphere water vapor, 836
mesoscale enhancement of surface fluxes for large-scale models, 402
Phase locking, variations in ENSO, 2570
Polar temperature, role of solar cycle and equatorial wind in quasi-biennial oscillation phase, 328
Population data, population metadata update for U.S. historical climatology network stations, 4028
Potential vorticity
energy balance model based on potential vorticity homogenization, 431
relations between potential vorticity, North Atlantic oscillation index, and the Gulf Stream, 2550
Power spectra, timescale, power spectra, and climate noise properties of teleconnection, 4430
Precipitable water, decadal variations in tropical total, effects of radiosonde changes on, 3337
Precipitation
analyses and reanalyses of ENSO signal in Antarctic precipitation, 1406
Australian, roles of SST, moisture flux, and Antarctic circumpolar wave on, 2125
comparison of freezing level and brightband altitude with NCEP–TRMM data, 4137
correlation between rainfall intensity and storm height, 4107
covariabilities of winter U.S. precipitation and Pacific SST, 3711
dependence of satellite sampling errors on monthly averaged rain rates, 449
deriving reflectivity profiles from TRMM precipitation radar data, 4072
diurnal variations of precipitation over tropical oceans using TMI data, 4149
dominant factors responsible for interannual summer monsoon variability, 759
ENSO indices based on patterns of satellite-derived, 2786
extreme precipitation events in the western United States, tropical forcing, 793
factors for seasonal predictability of U.S. precipitation, temperature, 3994
forecasts of long-lead outlooks in geographical areas, relation of, to ENSO, 2389
identifying mesoscale convective system precipitation with TRMM Microwave Imager over land and ocean, 4087
impact of subgrid variability in rainfall interception using BATS, 2887
improving forecast skill of daily rainfall totals with superensemble forecast, 4217
Indian Ocean SST and Indian summer rainfall, predictive relationships, 2503
Indochina summer monsoon, interannual variation in: possible mechanism, 1979
interannual variability in, over West Africa w.r.t. drought, 3827
interannual variability of Caribbean rainfall, ENSO, and Atlantic Ocean, 297
mean Arctic precipitation from reanalyses data, 182
mesoscale in NCEP reanalysis, validation of, using new gridcell dataset, 1936
model of ENSO phases and subsequent precipitation of South America, 2973
modeling tropical precipitation in a single column, 4378
occurrence of extreme events in California and relationship with Madden–Julian oscillation, 3576
pilot analysis of hourly rainfall in central and eastern Amazonia, 1326
regional model simulation of 1991 severe precipitation event, China, 74, 93
seasonal diagnostic and predictability of subtropical rainfall, 746
Southern Oscillation sea level pressures, surface temperatures, and precipitation, 4358
spaceborne rainfall/moisture observed to improve climate analysis/forecasting, 4180
trends of damaging floods in the United States, 3625
twentieth-century trends of Arctic precipitation, observation, and simulation, 1362
using self-organizing maps to investigate extreme climate events, 1718
variability over southern Africa, w.r.t. South Indian convergence zone, 3789
variance of, over entire North American monsoon domain, 2794
Precipitation interception, statistical–dynamical parameterization, 4050
Precipitation radar, indicates bimodal storm height distributions over oceans, 4107
Prediction, use of TOPEX/Poseidon sea level data for ocean analyses and ENSO, 216
Predictive relationships, Indian Ocean SST and Indian summer rainfall, decadal variability, 2503
Principal component analysis, nonlinear principal component analysis by neural networks, Lorenz system, 821
Probability distributions
changes of probability associated with El Niño, 4268
moments of and seasonal changes, w.r.t. atmospheric state, 3139
Quasi-biennial oscillation
link with solar cycle, 2652

role of solar cycle and equatorial wind in quasi-biennial oscillation phase, 328
Radiation
and clouds variations with northern midlatitude sea level pressure, 312
evaluation of simulated clear-sky longwave, using ground-based observations, 1951
radiative effects of cloud-type variations, 264
regional and seasonal variations in longwave cooling over tropical ocean, 2863
relationship of, with clouds, as determined by satellites and models, 3842
sensitivity of parameterizations to changes in vertical resolution, 915
Radiative flux, and hydrological cycle as illustrated in model of diurnal variation, 4159
Radiative forcing, net cloud radiative forcing at the top of the atmosphere in Asia, 650
Radiative heating rate profile, sensitivity of atmospheric, to variations of cloud layer overlap, 2941
Radiative transfer, indirect aerosol forcing by homogeneous and inhomogeneous clouds, 4042
Radiative transfer model, used to study sensitivity of radiative heating and fluxes to cloud variations, 2941
Radiosondes
estimated impact on climate records of adaptive strategies for scheduling, 2116
instrumentation changes, effect of, on observing tropical water vapor, 3337
sensitivity of tropospheric and stratospheric temperature trends to quality, 1776
thermodynamic and radiative impact of correction of humidity bias, 3611
Rain column
deriving oceanic rain column height from SSM/I data, 4125
improving estimations from depth rain column, 4072
Rainfall
characteristics of regional monsoon indices and sensitivity to SST anomalies, 2461
covariability of spring snowpack and summer rainfall in the U.S. Southwest, 4018
factor influencing Southwest rainfall is persistence of North Pacific SST anomalies, 3588
impact of subgrid variability in rainfall interception using BATS, 2887
Indochina summer monsoon, interannual variation in: possible mechanism, 1979
intraseasonal and interannual variability of rainfall over India, 4366
long rains, extended wet spells, seasonal rainfall anomalies in East Africa, 3915
rainfall-based ENSO indices derived from satellite observations, 2786
rainfall changes: wetter zones farther south; continued drought elsewhere, 2628
seasonal, in Brazil, real-time forecasting and verification for, 3821
variability over southern Africa, w.r.t. South Indian convergence zone, 3789
Rainfall interception, statistical–dynamical parameterization, 4050
Rainfall trends, observed, agreement of, with climate change simulations in southwest Europe, 3057
Rawinsonde, relative humidity profiles, use of, to construct global cloud vertical structure dataset, 3041
Reanalyses
atmospheric hydrologic cycle over the Arctic basin from reanalyses, 923
ECMWF, evaluation of, to simulate clear-sky longwave radiation, 1951
ECMWF, w.r.t. water vapor feedbacks and the Hadley Centre climate model, 3080
El Niño 1997/98 relative to previous El Niño events, 488
mean Southern Hemisphere extratropical cyclone behavior in the 40-yr, 873
NCEP–NCAR upper-air, w.r.t. role of zonal circulations in variability, 2746
NCEP, validation of mesoscale precipitation in, using new gridcell dataset, 1936
surface pressure trends in NCEP–NCAR reanalysis data over Antarctica, 3940
temperature estimates from, and uncertainties for climate change detection, 3187
use of, to evaluate the NCAR CCM3 GCM w.r.t. ENSO diabatic heating, 3152
Recharge oscillator, paradigm for ENSO, further investigation using a simple coupled model, 1987
Red Sea corals, troposphere–planetary boundary layer interactions, 339
Reflectivity profile, deriving reflectivity profiles from TRMM precipitation radar data, 4072
Regional climate, summer difference among Arctic ecosystems in regional climate forcing, 2002
Regional climate change, simulations in southwest Europe, agreement of, with observed rainfall trends, 3057
Regional models
climate change and poleward movement of tropical cyclonelike vortices, 1116
development/validation of an Antarctic regional climate system model, sea ice, 1337, 1351
Relative humidity, vertical profiles, use of, to construct global cloud vertical dataset, 3041
Remote sensing
comparison of freezing level and brightband altitude with NCEP–TRMM data, 4137
diurnal variations of precipitation over tropical oceans using TMI data, 4149
effect of radiosonde instrumentation changes on observed water vapor, 3337
global aerosol optical climatology with two-channel AVHRR, 2011
identifying mesoscale convective system precipitation with TRMM Microwave Imager over land and ocean, 4087
improving forecast skill of daily rainfall totals with superensemble forecast, 4217
model of diurnal variation of convection over tropical land area, 4159
spaceborne rainfall/moisture observations to improve climate analysis/forecasting, 4180
Resolution, influence of model horizontal resolution on climate data, 1554
Resonant interactions, between solar activity and climate, 3745
Satellite data
creation of ENSO indices from patterns of gridded precipitation, 2786
dependence of satellite sampling errors on monthly averaged rain rates, 449
heat sources and sinks of 1986–87 El Niño, 3533
variability and trends in Antarctic surface temperature, 1674
Satellite observations
clear-sky bias of TOVS upper-tropospheric humidity, 4034
top-of-atmosphere albedo estimation from angular distribution models, 1269
Savanna, subtropical African, as shaped by vegetation–climate variability interaction, 2665
Sea ice
Antarctic sea ice, 1990s impact on a short climatology, 4441
Antarctic sea ice extent variability and its global connectivity, 1697
Arctic, and interplay between ice dynamics and thermodynamics, 3099

climate, model climate stability and perturbations of hydrological cycle, 463
w.r.t. global warming in coupled model in response to increased CO_2, 1879
Sea level
assimilation of, into operational coupled models through altimetry, 3115
ENSO prediction with Markov models, the impact of, 849
seasonal and interannual sea levels in the western equatorial Pacific, 672
Sea level anomalies, monthly, analysis of, using tide gauge data, 2757
Sea level pressure
influence of thermohaline circulation on projected sea level pressure rise, 1997
optimal interpolation analysis applied to sea level pressure data and verification with land observations, 2987
Southern Oscillation sea level pressures, surface temperatures, and precipitation, 4358
Sea surface temperatures
anomalies in the Nordic seas, 1044
anomalies, tropical Pacific, w.r.t. El Niño, and equatorial westerly wind, 1814
changes of probability associated with El Niño, 4268
characteristics of regional monsoon indices and sensitivity to SST anomalies, 2461
covariabilities of winter U.S. precipitation and Pacific SST, 3711
cross-equatorial heat transport effect on SST heat balance and regulation, 3342
decadal evolution of warm/cold anomalies in subtropical and subpolar gyres, 2697
ENSO variability and SST teleconnections to summer drought in the United States, 4244
heat budgets and sea surface temperature in the Pacific warm pool, 634
high predictability of interannual variability in Tropics with SST anomaly, 2591
influence of Atlantic SST anomalies on the North Atlantic oscillation, 122
interannual and interdecadal variability of East Asian summer monsoon and SST, 4310, 4326
interannual and interdecadal variability over summertime North Pacific, 422
interannual to decadal variability in the tropical Atlantic, 777
ITCZ, and ENSO relations with North American monsoon system, 2794
link of, with moisture flux, Antarctic circumpolar wave, and precipitation, 2125
local, effect on atmospheric circulation over tropical Atlantic, 2195
long-lead prediction of Pacific SSTs via Bayesian dynamic modeling, 3953
neural networks vs canonical correlation analysis predicting SST, 287
pattern and evolution of interdecadal oscillations and global symmetry, 3209
persistence of decadal anomalies in the North Atlantic, 3017
physical mechanism for ENSO transition from a warm to a cold state, 2056
predicting SST anomalies in the Pacific, 3298
predicting SST anomalies over equatorial Pacific Ocean, 2428
prediction of tropical Pacific sea surface temperature anomalies, 3
relationship between midlatitude storm track and horizontal deformation field, 2712
relationship with convection on intraseasonal timescales, 2086
relationship with low-frequency variability in the Southern Hemisphere, 3599
role in interannual variability of summer monsoon onset, 2483
role of cloud microphysics on, as revealed by cloud-resolving model, 2306
role of SSTs in tropical and North Atlantic oscillations, 3285
seasonal diagnostic and predictability of subtropical rainfall, 746
simulation of interannual SST variability in the tropical Indian Ocean, 3487
simulation skills of SST-forced global climate variability, 3657
temporal and advective terms in heat/salt balance equations during the intraseasonal oscillation, 2409
translating the nature of air–sea interactions into simple signatures, 3361
tropical ocean response to change in solar forcing, 1133
tropical Pacific, effect of, on seasonal atmospheric variability, 3139
used with singular value decomposition analysis to identify major patterns in Southern Oscillation and North Atlantic oscillation, 2987
whether internal dynamics of ENSO possess annual cycle (w.r.t. SST anomalies), 3327
w.r.t. effect of successive correction on variability estimates for dataset, 1845
w.r.t. tropical sensitivity of a coupled model to specified ISCCP low cloud, 2239
Sea surface temperature anomaly, factor influencing Southwest rainfall in persistence of North Pacific SST anomalies, 3588
Seasonal climate patterns, feedbacks of deciduous forest phenology in the western Canadian interior, 4229
Seasonal forecasting
and verification, real-time, for rainfall in Brazil, 3821
use of altimetry for operational, 3115
Seasonal means, decomposing into weather noise/boundary forcing/internal dynamics component, 2591
Seasonal predictability
factors for seasonal predictability of U.S. precipitation, temperature, 3994
over North America with regional model nested in a global model, 2605
Semiannual oscillation, interannual variations in Southern Hemisphere winter circumpolar vortex, 991
Semi-Lagrangian modeling, w.r.t. uncertainties in the NCAR Community Climate Model, 3860
Sensitivity
ocean response to low-frequency interannual atmospheric variability, 705
of tropospheric and stratospheric temperature trends to radiosonde quality, 1776
sensitivity of the tropical hydrological cycle to ENSO, 538
Severe weather
long-term fluctuation in hail incidences in the United States, 658
regional model simulation of 1991 severe precipitation event, China, 74, 93
trends of precipitation and damaging floods in the United States, 3625
Simple models, global warming simulated using a, 202
Simulation
coupled ocean–atmosphere model simulations for 125 kyr BP, 1057
simulation of interannual SST variability in the tropical Indian Ocean, 3487
simulation skills of SST-forced global climate variability, 3657
southern midlatitude zonal wind interaction with ocean in simulations, 562
using a global soil wetness database to improve seasonal climate simulation, 2900
Single-column models
modeling tropical precipitation in a single column, 4378
solution uncertainties in single-column model frameworks, 352

Singular value decomposition, covariabilities of winter U.S. precipitation and Pacific SST, 3711
Singular vector, varies with seasonal cycle and shows interannual variability, 3298
Skill, neural networks vs canonical correlation analysis predicting SST, 287
Smoothing, by successive correction, effect of, on variability estimates for datasets, 1845
Snow cover
effects of variations in East Asia on atmospheric circulation over Pacific, 3700
variability and change in Northern Hemisphere, 1915–97, 2339
Snowpack, covariability of spring snowpack and summer rainfall in the U.S. Southwest, 4018
Soil moisture
dependence of summertime daily max temperature on antecedent soil moisture, 2641
influence of soil water-holding capacity on global water cycle in GCM, 4393
Soil water-holding capacity, influence on global water cycle in GCM, 4393
Soil wetness, using a global soil wetness database to improve seasonal climate simulation, 2900
Solar activity, resonant interactions with climate, 3745
Solar cycle
link with quasi-biennial oscillation, 2652
role of solar cycle and equatorial wind in quasi-biennial oscillation phase, 328
Solar forcing, tropical ocean response to change in, 1133
Soundings, thermodynamic and radiative impact of correction of humidity bias, 3611
South America, atmospheric water vapor cycle in, and the tropospheric circulation, 1899
South Indian convergence zone, w.r.t. interannual rainfall variability over southern Africa, 3789
Southern Africa, precipitation variability w.r.t. the South Indian convergence zone, 3789
Southern Hemisphere, mean Southern Hemisphere extratropical cyclone behavior, 873
Southern Ocean, surface pressure trends in NCEP–NCAR reanalysis data over Antarctica, 3940
Southern Oscillation
boreal spring Southern Oscillation persistence barrier and variability, 665, 668
rectification of the Madden–Julian oscillation into the ENSO cycle, 3560
Southern Oscillation sea level pressures, surface temperatures, and precipitation, 4358
Southern Oscillation index, oscillation index analysis applied to sea level pressure data and verification with land observations, 2987
Southwest United States, covariability of spring snowpack and summer rainfall in the U. S. Southwest, 4018
SSM/I, deriving oceanic rain column height from SSM/I data, 4125
State transitions, physical mechanism for ENSO transition from a warm to a cold state, 2056
Stationary waves, driving the zonal-mean jet anomalies of the northern winter, 2160
Statistics, regional model simulation of 1991 severe precipitation event, China, 74
Statistical analysis, optimal detection using cyclostationary EOFs, 938
Statistical forecasting, and verification, real-time, for seasonal rainfall in Brazil, 3821
Statistical prediction, cyclostationary processes, 1098
Stochastic forcing
as cause of ENSO irregularity and variability, 2818
wind stress, relation to large-scale variability of the main thermocline, 2833
Stochastic weather generator, tool to translate ENSO forecast into regional conditions and impacts, 2973
Storms, twentieth-century activity along the East Coast, 1748
Storm data, summary of lightning-related deaths, injuries, and damage reports, 3448
Storm tracks
interannual and interdecadal variability over summertime North Pacific, 422
interannual variability of upper troposphere water vapor and ENSO, 59
midlatitude, and horizontal deformation field, relationship between, 2712
Stratosphere, climate, response of, to projected changes in greenhouse gases, 2142
Subsidence, and upper-tropospheric drying along trajectories in a GCM, 257
Subtropical mode water, correlation of subtropical mode water and atmospheric buoyancy forcing, 2550
Subtropical ridge, interannual and interdecadal variation of East Asian monsoon and tropical SST, 4310
Successive correction, smoothing, effect of, on variability estimates for climatological datasets, 1845
Summer monsoon, dominant factors responsible for interannual variability in the Southwest, 759
Superensemble forecasting, improving forecast skill of daily rainfall totals with superensemble forecast, 4217
Surface air temperature, strengthening (weakening) of cooling over subtropical (high latitude) regions, 4341
Surface observations, population metadata update for U.S. historical climatology network stations, 4028
Surface pressure
annual and semiannual variations of surface pressure in Taiwan, 1436
surface pressure trends in NCEP–NCAR reanalysis data over Antarctica, 3940
Surface temperature, Southern Oscillation sea level pressures, surface temperatures, and precipitation, 4358
Surface temperature anomalies, in the western Canadian interior, 4229
Systematic errors, correction in coupled GCM forecasts, 2072
Taiwan, annual and semiannual variations of surface pressure, 1436
Teleconnections
climate in the Andes of Ecuador and relationship to sea surface temperature, 2520
empirical orthogonal teleconnections, 1421
ENSO variability and SST teleconnections to summer drought in the United States, 4244
Northern Hemisphere patterns during extreme phases zonal-mean circulation, 1037, 1040
Pacific–East Asian, 1517
timescale, power spectra, and climate noise properties, 4430
Temperature
and humidity, near-surface, relationship of, to cloud cover in GCMs, 1858
dependence of summertime daily maximum temperature on antecedent soil moisture, 2641
factors for seasonal predictability of U.S. precipitation, temperature, 3994
recent trends of surface minimum and maximum over eastern Africa, 2876
sensitivity of tropospheric and stratospheric trends to radiosonde quality, 1776
tropospheric estimates of, and uncertainties for global climate change, 3187
variability and trends in Antarctic surface, 1674

variance, midtropospheric submonthly, low-frequency signals in, 2323
variations in surface air observations in the Arctic, 896
w.r.t. probability of future climatically significant volcanic eruptions, 1445
Temperature profile, decadal variability identified in hydrographic temperature profile, 2697
Temperature records, method to adjust long-term extreme series for nonclimatic inhomogeneities, 3680
Temperature trends, in Antarctica, interpretation of, 3885
Thermal expansion, ocean and coupled general circulation models, 1384
Thermal feedback, on wind stress as a contributing cause of climate variability, 232
Thermocline
annual adjustment of the thermocline in the tropical Pacific Ocean, 596
sharpness of equatorial, influence of vertical mixing and warm water on, 3638
Thermocline variations, role of stochastic wind stress forcing in generating, 2833
Thermohaline circulation
changes in North Atlantic, may be counteracted by Arctic oscillation change, 3721
imperfections of, latitudinal asymmmetry and preferred northern sinking, 366
influence on projected sea level pressure rise, 1997 multidecadal variability driven by atmospheric surface flux forcing, 1481
role of North Atlantic oscillation in thermohaline circulation from surface heat/freshwater flux observations, 3239
tropical stabilization of the, in a greenhouse warming simulation, 1809
Tide gauge data, w.r.t. analysis of monthly sea level variations, 2757
Time series, used to examine oscillation in time series of 3-hourly precipitation amount, 2923
Timescales, dominant, of natural climate variability in the Arctic, 3412
TOGA COARE, temporal and advective terms in heat/salt balance equations during the intraseasonal oscillation, 2409
TOPEX/Poseidon
analysis of monthly sea level variations, 2757
seasonal and interannual sea levels in the western equatorial Pacific, 672
TOVS data, clear-sky bias of TOVS upper-tropospheric humidity, 4034
Tracking, variability of Southern Hemisphere extratropical cyclone behavior, 550
Transients, role in dynamics of east Asian summer seasonal mean circulation anomalies, 3511
Transient vorticity flux, role of forcing in maintaining observed circulation anomalies over Asia, 3511
Trends
annular modes in extratropical circulation, 1018
Arctic sea ice variability and recent atmospheric circulation trends, 617
long-term fluctuation in hail incidences in the United States, 658
recent surface temperature minimum and maximum over eastern Africa, 2876
twentieth-century trends of Arctic precipitation, observation, and simulation, 1362
TRMM
comparison of freezing level and brightband altitude with NCEP–TRMM data, 4137
correlation between rainfall intensity and storm height to estimate precipitation, 4107
deriving oceanic rain column height from SSM/I data, 4125
deriving reflectivity profiles from TRMM precipitation radar data, 4072
diurnal variations of precipitation over tropical oceans using TMI data, 4149
identifying mesoscale convective systems precipitation with TRMM Microwave Imager over land and ocean, 4087
improving forecast skill of daily rainfall totals with superensemble forecast, 4217
model of diurnal variation of convection over tropical land area, 4159
spaceborne rainfall/moisture observations to improve climate analysis/forecasting, 4180
success of ensemble forecasting for atmospheric GCMs, 4196
Tropics
role of longwave heating in forcing surface winds, 3172
thermodynamic and radiative impact of correction of sounding humidity bias, 3611
Tropical Atlantic Ocean, local SST effect on atmospheric circulation over, 2195
Tropical atmosphere–ocean, data, use of, to reject nonlinear intermediate model dynamical system, 2770
Tropical climate, role of cloud microphysics in, as revealed by cloud-resolving model, 2306
Tropical climatology, Indian Ocean low clouds during the winter monsoon, 2028
Tropical cooling, last glacial maximum, atmosphere–mixed layer ocean model simulation, 951
Tropical cyclones
activity over western North Pacific associated with El Niño and La Niña, 2960
Caribbean, activity and relation to hurricane activity, 2293
climate change and poleward movement of tropical cyclonelike vortices, 1116
intensity increase near Australia resulting from climate change, 3029
testing for trend in partially incomplete record, 3696
Tropical longwave cooling, regional and seasonal variations, 2863
Tropical meteorology, modeling tropical precipitation in a single column, 4378
Tropical oceans
interannual to decadal variability in the tropical Atlantic, 777
response to change in solar forcing, 1133
surface wind momentum balance and modeling the linear friction coefficient, 1733
Tropical Pacific, sensitivity of intermediate ocean–atmosphere coupled model to ocean layers, 2363
Tropical patterns, seasonal diagnostic and predictability of subtropical rainfall, 746
Tropical SST, w.r.t. sensitivity of a coupled model to specified ISCCP low clouds, 2239
Tropical stabilization, of the thermohaline circulation in a greenhouse warming simulation, 1809
Tropical storms, modulation of eastern North Pacific, by Madden–Julian oscillation, 1451
Troposphere
factors controlling upper-troposphere water vapor, 836
interannual variability of upper-troposphere water vapor and ENSO, 59
Tropospheric temperatures, estimates and uncertainties of, for global climate change detection, 3187
United States
ENSO variability and SST teleconnections to summer drought in the, 4244
population metadata update for U.S. historical climatology network stations, 4028
Upper ocean, an upper-ocean model for short-term climate variability, 3380
Upper troposphere
clear-sky bias of TOVS upper-tropospheric humidity, 4034
subsidence and drying along trajectories in a general circulation model, 257
Validation, monthly mean clear-sky longwave dataset, effects of 1998 ENSO event, 4256

Variability
annual adjustment of the thermocline in the tropical Pacific Ocean, 596
annular modes in month-to-month variability in extratropical circulation, 1000
Antarctic sea ice extent variability and its global connectivity, 1697
between Pacific Ocean Tropics and midlatitudes on decadal timescale, 1173
causes of Atlantic Ocean climate variability 1958–98, 2845
climate in the Andes of Ecuador and relationship to sea surface temperature, 2520
climatic, role of Indian Ocean zonal–vertical circulation in, 2746
decadal variability and predictability, midlatitude ocean–atmosphere, 1073
dominant factors responsible for interannual summer monsoon variability, 759
elements of climate variability in the tropical Atlantic region, 3261
ENSO simulated with intermediate coupled model, evaluated with observations, 1605
estimates for climatological datasets, effect of successive correction on, 1845
Indian monsoon–ENSO relationship on interdecadal timescale, 579
interannual and interdecadal variability over summertime North Pacific, 422
interannual to decadal in the tropical Atlantic, 777
interannual variability in the Gulf of Alaska during 1991–94 El Niño, 1664
interannual variations in Southern Hemisphere winter circumpolar vortex, 991
interannual zonal mean flow, is it climate noise?, 2356
interdecadal change of the structure of the ENSO mode, impact on frequency, 2044
low-frequency signals in midtropospheric submonthly temperature variance, 2323
multidecadal thermohaline circulation variability driven by surface flux, 1481
natural, in the Arctic, dominant timescale of, 3412
ocean response to low-frequency interannual atmospheric variability, 705, 732
of Southern Hemisphere extratropical cyclone behavior, 550
radiation and clouds variations with midlatitude sea level pressure, 312
seasonal and interannual sea levels in the western equatorial Pacific, 672
simulation of interannual SST variability in the tropical Indian Ocean, 3487
simulation skills of SST-forced global climate variability, 3657
southern midlatitude zonal wind interaction with ocean in simulations, 562
southern South American climate associated with El Niño–La Niña, 35
spatial variability of atmospheric boundary layer structure, 1574
temperature variability in three 1000-yr coupled model integrations, 513
thermal feedback on wind stress as a contributing cause of climate, 232
trends in Nordic and Arctic temperature extremes and ranges, 977
twentieth-century activity along the East Coast, 1748
upper-ocean model for short-term climate variability, 3380
variations in ENSO phase locking, 2570
variations in surface air temperature observations in the Arctic, 896
Variation
decadal air–sea interaction North Atlantic, observations and modeling, 1195
semiannual and annual, of global atmospheric angular momentum, w.r.t. harmonic, 3221
variability and trends in Antarctic surface temperature, 1674
Vector analysis, singular, on linearized variant of ENSO model to determine ENSO causes, 2818
Vegetation
interaction with climate variability and effect on shaping the savanna, 2665
large-scale vegetation feedbacks on a doubled CO_2 climate, 1313
model, coupled with atmosphere–land model, to study effects on savanna, 2665
Vegetation–climate feedback, the conversion of tropical savanna to grassland, 1593
Vegetation density, effect of changes in, on global and regional climate, 2277
Vegetation index, normalized difference, sensitivity of climate to changes in, 2277
Vertical motion, interannual variability in, over West Africa w.r.t. drought, 3827
Vertical velocity, modeling tropical precipitation in a single column, 4378
Volcanic eruptions, probability of future climatically significant, 1445
Vorticity, equation model, use of, w.r.t. harmonics of global angular momentum change, 3221
Vorticity budget calculations, and East Asian summer seasonal mean circulation anomalies, 3511
Warm surface water, accumulation, influence of, on sharpness of equatorial thermocline, 3638
Warm water volume, changes in the equatorial Pacific and relationship to El Niño and La Niña, 3551
Water cycle, influence of soil water-holding capacity on global water cycle in GCM, 4393
Water vapor
cycle, atmospheric, in South America and the tropospheric circulation, 1899
factors controlling upper troposphere, 836
feedbacks in ECMWF reanalysis and Hadley Centre climate model, 3080
flux, interannual variability in, over West Africa w.r.t. drought, 3827
Water vapor content, decadal variations in tropical, effects of radiosonde changes on, 3337
Waves
atmospheric, wave-maintained annular modes of climate variability, 4414
stationary, do they drive zonal-mean jet anomalies of northern winter?, 2160
Waveguide warming, w.r.t. tropical Pacific SST anomalies and equatorial westerly wind events, 1814
Weather noise, estimating weather noise variability based only on monthly data, 2591
West Africa, interannual variability in rainfall, water vapor flux, and vertical motion, 3827
Western Pacific, equatorial, intraseasonal surface cooling in the, 2261
Winds
global monsoon seen through divergent atmospheric circulation, 3969
momentum balance and modeling the linear friction coefficient, 1733
southern midlatitude zonal wind interaction with ocean in simulations, 562
Wind stress, thermal feedback as a contributing cause of climate variability, 232
Wind stress forcing, stochastic, role of, in generating large-scale thermocline variations, 2833
Winter atmospheric anomalies, over North Pacific and North America associated with El Niño SSTs, 3435
Zonal index, relationship between interannual and intraseasonal, w.r.t. climate noise, 2356
Zonal mean flow, variability, interannual, is it climate noise?, 2356
